EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Reed Duthler on March 8, 2010.

The application has been amended as follows:

Claim 2 has been amended as follows:

2. A method performed by a processor for storing and processing physiological mechanical data in an implantable medical recording device, the method comprising:

sampling one or more physiological signals at a selected sampling rate;

deriving physiological parameter values from the sampled signal to obtain parameterized signal data at a rate lower than the selected sampling rate of the physiological signal;

storing the parameter values as they are determined in a temporary memory buffer for a predetermined storage interval;

determining a statistical aspect of the stored parameter values in the temporary buffer upon expiration of the storage interval; and

writing the statistical aspect as it is determined for a plurality of the predetermined storage intervals to a long-term memory buffer, the long-term memory buffer storing the statistical aspects for a long-term storage interval, the long-term memory buffer thereby storing statistical aspects

Art Unit: 3769

having a temporal resolution of the parameter values corresponding to the predetermined storage interval of the temporary memory buffer, further comprising:

allocating the temporary memory buffer into at least two different temporary memory buffers and programming a unique storage interval to each of the two different temporary memory buffers.

Claims 26 – 28 have been cancelled.

The following is an examiner's statement of reasons for allowance:

The Examiner agrees with Applicant that the prior art alone or in combination fails to disclose:

"determining a statistical aspect of the stored parameter values in the temporary memory buffer upon expiration of the storage interval; and writing the statistical aspect as it is determined for a plurality of the predetermined storage intervals to a long-term memory buffer, the long-term memory buffer storing the statistical aspects for a long-term storage interval, the *long-term memory buffer thereby storing statistical aspects having a temporal resolution of the parameter values corresponding to the predetermined storage interval of the temporary memory buffer*, further comprising:

allocating the temporary memory buffer into at least two different temporary memory buffers and *programming a unique storage interval to each of the two different memory buffers* (emphasis added)."

The prior art of record samples physiological data at varying rates and compresses data by discarding portions of the physiological data, but does not determine statistical aspects of the stored parameters and store those statistical aspects to memory buffers with corresponding temporal resolutions to the parameters and having unique storage intervals.

Art Unit: 3769

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kai Rajan whose telephone number is (571)272-3077. The examiner can normally be reached on Monday - Friday 9:00AM to 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Johnson can be reached on 571-272-4768. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
